Detection Tools

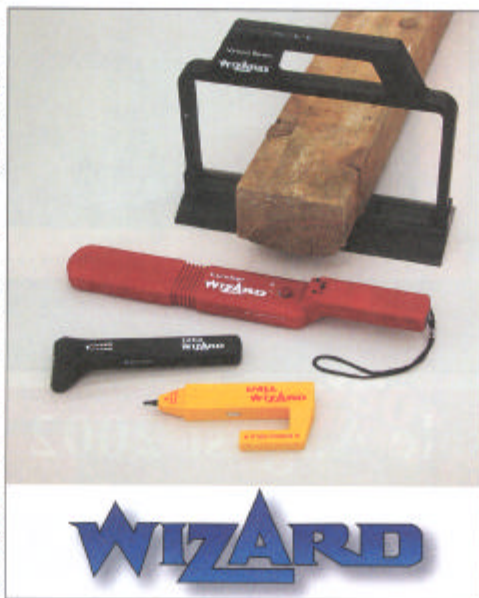

Wizard Distribution is proud to announce three new tools to help prevent costly blade damage and personal injury. Wizard has developed this array of unique precision metal detectors specifically for woodworkers and the woodworking industry.

First in the new line-up is the Little Wizard hand-held metal detector. It is designed to detect metal objects buried up to 1½" deep in wood. It is small, lightweight, and inexpensive. The Little Wizard retails for only \$19.95 and is currently available through 5,600 ACE Hardware stores, as well as many other woodworking and specialty tool suppliers and hardware stores.

The hottest new woodworking tool on the market is the new Lumber Wizard, which retails for \$99.95. This is the most powerful of all the metal detectors in its field. The Lumber Wizard is a powerful precision hand-held metal detector utilizing the same technology as many security detectors commonly used inside airports and prisons. However, the Lumber Wizard departs from other security-type detectors with added features for woodworkers. The Lumber Wizard provides powerful precise detection of small metal objects that can be buried up to 4" inside new or used lumber. It includes a special "vibration alert" allowing easy use in noisy workshops, or by the

hearing impaired.

The grand finale to this impressive new line-up is the Wood Scan Wizard. The very unique metal detector will be a welcome addition to woodshops everywhere. The Wood Scan Wizard is a special "loop" style metal detector that allows wood and lumber to be passed through its 8" tall by 14" wide scanning loop. Wood or lumber is scanned with powerful detector coils that can penetrate up to 3" thick on all

Benchtop Jointer

Grizzly Industrial is proud to announce the introduction of the Model H2801 4" Jointer!

If your smaller projects cannot justify the expense of a stationary jointer, Grizzly has the perfect benchtop model for you! Whatever the size of your project, quality work demands the function of a jointer. Edges will glue up tighter, corners will line up straighter and your whole project will go together more smoothly. The Model H2801 features a cast iron table, 2 HSS knives and positive stops at 45° and 90°. Don't put off buying a jointer any longer when this handy benchtop version is available. You'll wonder how you lived without one!

The Model H2801 4" Jointer is available in the Grizzly 2002 Catalog for \$179.95. As with all Grizzly products, the Model H2801 is proudly backed by a full one-year warranty. For more information call (800)-523-4777 or visit their Web Site at www.grizzly.com.
